

Harishan Rajendrakumar MBCS

Lead UI/UX Engineer | Product Designer | Frontend Engineer | React & Next.js

Colombo, Sri Lanka | harishan820@gmail.com | [+94 77 173 1177](tel:+94771731177) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Lead UI/UX Engineer with **5+ years of experience** shaping and shipping customer-facing travel products for UK audiences. Combines **product design judgment with hands-on React and Next.js engineering**, taking work from requirements and competitive review through Figma, responsive implementation, API integration, release and iteration. Leads frontend delivery across the company portfolio, using stakeholder input, session recordings, heatmaps and website analytics to improve **booking and conversion journeys**. Experienced in design systems, cross-functional delivery, mentoring, and translating complex travel-commerce requirements into **clear, buildable interfaces**.

CORE SKILLS

Product Design and UX

Figma, Auto Layout, design systems, responsive UI, wireframes, interactive prototypes, user flows, information architecture, competitive analysis, design critique

Product Optimisation

Booking and conversion journeys, Microsoft Clarity, session recordings, heatmaps, website analytics, usability improvement, content hierarchy, UI quality assurance

Frontend Engineering

React, Next.js, JavaScript ES6+, HTML5, CSS3, Material UI, Tailwind CSS, REST APIs, third-party integrations, reusable component architecture, responsive development

Leadership and Delivery

Design direction, requirements clarification, stakeholder management, frontend planning, task delegation, mentoring, interviewing, code review, release coordination

EXPERIENCE

Techneapp UK / Scripterlab Sri Lanka | *In-house technology team supporting Vibes Group UK* | Colombo | Hybrid

Lead UI/UX Engineer

Jul 2024 - Present

Product ownership, design leadership, frontend engineering and team delivery

- Lead UI/UX direction and frontend delivery across the **Vibes Group UK portfolio of consumer travel brands and corporate platforms**, combining hands-on product design and **React and Next.js development** with team leadership and stakeholder management.
- Own the product experience for **World Cruise Vibes** and the **Vibes Group UK corporate platform**, leading ongoing UI/UX direction, frontend evolution, feature improvements and cross-functional delivery across both products.
- Led **World Cruise Vibes** from concept to launch, defining its information architecture, responsive design system, key customer journeys and frontend approach while coordinating backend API integration and team contributions.
- Partner with the **CTO, CEO and senior business stakeholders** to turn commercial priorities into product requirements, interface decisions and conversion-focused delivery plans.
- Lead the frontend team by setting priorities, breaking initiatives into deliverable tasks, delegating work, mentoring engineers, reviewing code and UI quality, and coordinating releases across multiple brands.
- Use **Microsoft Clarity session recordings and heatmaps, website analytics, customer-facing team feedback and internal reviews** to identify friction and recommend changes to content, navigation and booking flows.
- Collaborate closely with backend and SEO teams on API requirements, technical constraints, performance, product enhancements and search-driven improvements while promoting reusable components and consistent interaction patterns across products.

UI/UX Engineer

Sep 2022 - Jun 2024

Product design, frontend engineering and feature ownership

- Owned major UI/UX and frontend initiatives across **World Holiday Vibes, World Flight Vibes, Low Cost Vibes, World Pinoy Flights and Sri Lanka Holiday Vibes**, translating business requirements into complete customer-facing experiences.

- Designed and delivered core travel-commerce journeys including **flight and hotel search, results pages, holiday deals, promotions, enquiries, passenger details and payment flows**, taking features from requirements through design and production.
- Turned product briefs into **user flows, information architecture, responsive layouts and interaction behaviour**, making practical UX decisions around hierarchy, navigation, usability and conversion.
- Researched competitor products and relevant design patterns, created concepts and prototypes in **Figma**, and implemented approved solutions using **React, Next.js, Material UI and Tailwind CSS**.
- Worked directly with backend engineers to define API and data requirements, resolve implementation constraints and integrate API-driven functionality into customer-facing products.
- Improved frontend consistency and delivery efficiency by extending **shared components, reusable interaction patterns and common UI architecture** across multiple websites.
- Took increasing responsibility for feature delivery while supporting interns and junior developers through design feedback, implementation guidance and UI/code reviews.

Associate UI Engineer

Aug 2021 - Aug 2022

Visual design, UI systems and design-to-code development

- Progressed from requirement-based frontend implementation into a combined **UI design and frontend engineering role**, contributing to the visual evolution of the company's travel products.
- Created the selected design direction for **World Pinoy Flights** after presenting concepts alongside senior colleagues, then developed that direction into detailed page designs and production interfaces.
- Built reusable layouts and interface elements using **Figma components, Auto Layout, typography and colour systems**, creating greater consistency between design concepts and implemented pages.
- **Analysed UK travel products, customer-facing design conventions and visual references** to develop original interfaces suited to the target audience and commercial context.
- Strengthened expertise in **responsive design, reusable frontend components and design-to-code workflows**, establishing the foundation for taking broader product and feature ownership in the following role.

UI Engineer Intern

Mar 2021 - Aug 2021

Requirement-based UI design and implementation

- Translated supplied requirements into responsive web interfaces, initially working directly in code and later preparing Figma concepts for larger assignments before development.
- Built customer-facing pages and interactive UI elements, incorporated senior feedback, and developed practical experience in responsive design, frontend implementation and iterative delivery.

SELECTED PRODUCT PORTFOLIO

World Cruise Vibes : Led the product from concept through MVP launch and ongoing releases, defining its information architecture, customer journeys, responsive design system, visual direction and frontend approach.

Vibes Group UK : Designed and delivered core interfaces and customer journeys for the group's corporate platform, bringing its travel brands, products and services into a unified responsive experience.

World Holiday Vibes : Designed and developed major customer-facing experiences across travel discovery, holiday deals, itineraries, promotions and enquiry journeys.

World Pinoy Flights : Created and presented the original visual direction, developed the selected concept into detailed Figma designs and production interfaces, and later supervised a subsequent redesign.

Additional Portfolio : Delivered UI/UX and frontend work across **Sri Lanka Holiday Vibes**, **World Flight Vibes** and **Low Cost Vibes**, extending shared travel-commerce patterns across the product ecosystem.

EARLIER EXPERIENCE

Software Developer Intern

Sep 2019 - Jan 2020

Matrix Total Enterprise Solutions Pvt Ltd | Colombo | On-site

- Designed interfaces in **Figma** and developed the frontend for an internal student portal covering membership, student records and project administration, collaborating with another intern responsible for backend development.
- Designed workflows for authorised staff and academic reviewers to review student projects and provide feedback, then integrated the interfaces with backend functionality as part of the end-to-end implementation.
